

TESTIMONIALS

It was a life saver!

“Bought this during the snow/ice storm in Portland. Our power was out for almost four full days. Our house was 35 degrees. Had a space heater, two fridges, two lamps, small TV and DVD and a few phone/flashlight chargers on it for 82 hours almost constantly. It was a life saver. It was averaging 8-9 hours per tank (2 gal).”

This generator saved us!

“This generator saved us during the ice storm. It has enough power to run both our furnaces. We could also run one furnace and the fridge at a time. We had to play musical extension cords, but we didn't lose any food. Money well spent!”

Worked great for power outage.

“Bought this during a power outage. It powered my furnace, refrigerator, and television. Lasted about 10 hours in a tank of gas. Added the stabilizer as recommended in the manual, and it started first pull.”

Saved our butts.

“This thing saved our butts after a microburst caused a massive power outage in our area. It ran continuously for about 17 hours. Quiet. Low fuel consumption. While everyone else was in the dark, we were able to function almost normally, including the refrigerator, a sewage effluent pump, lights, fans, and all our WiFi networking equipment and television's. I'm super happy with this generator.”

Kept our house running during a 54-hour outage.

“Living in mid-Michigan, we have been blessed with multiple power outages due to high winds and downed trees on power lines during the fall of 2021 and now the fall of 2022. I have used the generator 5 separate times, for a total of 183 hours of use. One outage was for over 54 hours, and it never missed a beat. It ran my well pump, propane furnace blower, microwave, all the house lights, and we stayed nice and warm. I can't say a single bad thing about this generator. Great job on this one.”

Life saver.

“I, my house, and my dogs survived the recent tornados but with no power and my old generator failing, this at least kept us warm in the subfreezing temperatures. I'll fix the old one, and with this one, I'll be able to run everything in the house, but this was really a life saver.”

TESTIMONIALS

Best generator for emergency home use!!!

“ I recently bought quite a few of these generators and took them to Louisiana for friends, family, and complete strangers who are now, life-long friends... as they all lost power and more during Hurricane IDA. I visited several locations from South Carolina all the way through Georgia, Alabama, and into Louisiana to pick up enough generators to fill both my truck & trailer. Being that Louisiana is my hometown... this storm hit my heart so hard! In 2012, I lost my entire home as the flood waters from Hurricane Isaac washed it off its foundation and into the river. I know what total loss is, and having a reliable means of charging phones, running the refrigerator, and possibly doing more without contributing to the noise of the surroundings is a HUGE PLUS!! This new generator is by far the best one I or anyone with our team has seen to date!! THANK YOU FOR BRINGING THIS AFFORDABLE UNIT TO MARKET!!!”

— David - September 9, 2021

Amazing generator, ran like a dream.

“ I just used this generator to power my whole home for roughly 63 hours and only rested it for roughly 45 minutes a day to do an oil change. I am in Portland, Oregon, and we had a historic storm. With temperatures as low as 15 degrees. My next door neighbor's house was 39 degrees inside, but not us; we were sitting at 70 degrees. This generator saved our lives.”

Saved us through storms and hurricanes.

“ I purchased this generator a couple months ago to restore power during hurricanes and storms. This generator is perfect enough to power a three-story, two-family home while running the essentials.”
